

UHF Radio RFP Addendum 3

The following questions were posed on 10-22-12.

Q. Should we include the pricing for tower climbers to install the antenna for the Repeater System? There was confusion as to whether Crown Castle is paying for this.

A. Crown Castle will select and provide the tower climbers. The cost of that work is separate from the RFP, and will be paid directly by the Town of Somers.

Q. You are seeking non LTR [Logic Trunked Radios] radios for this RFP, correct?

A. That is correct.

Q. Can it be assumed that an open rack with enough height to fit the specified components will be located inside a shelter? In other words we are not to price an outdoor cabinet.

A. An outdoor cabinet is NOT required. The RFP quotation should reflect both the cost of providing a suitable open rack, and as an alternative, the cost to provide a suitable locking cabinet.
