*Re: Roulier Family Limited Partnership – 50 Hangdog Lane, Somers ,CT.*

*Dear Commissioners:*

*I have conducted a delineation to identify the Connecticut regulated wetland soils on the above referenced parcel located at 50 Hangdog Lane in Somers, CT. This delineation was conducted for the purposes of identifying wetland soils as they relate to a proposed Driveway Plan prepared by J R Russo of 1 Shoham Road, East Windsor, CT. This plan is dated 1/26/21 – Job number 2020-094.*

*The wetlands on this plan have been field delineated in accordance with the standards of the National Cooperative Soil Survey and the definition of wetlands as found in the Connecticut General Statutes, Chapter 440, Section 22A-38.*

*This delineation is not intended to be used for soil mapping but to identify the wetland soils relative to the development and management of this parcel.*

**Wetlands**

*On Thursday April 1,2021, George Logan of REMA Ecological Services LLC., Jay Ussery of J.R. Russo Associates and I conducted a field survey to identify current wetland soils on the abovementioned parcel. Mr. Logan and I concurred that the only wetland soils in the area of concern was a small manmade impoundment ( pond ) which is located on the plan by JR Russo.*

*A very small area immediately downgradient of a corrugated plastic pipe showed limited redox features but is too small to be considered a mappable unit. This pipe carries water from footing and roof drains from the residence above.*

*I have read the email of 4/3/2021 from George Logan and completely concur with his findings.*

**Conclusions:**

*It is my professional opinion that the proposed driveway will present no short or long term significant adverse impact to the wetland resources as long as adequate protective provisions are in place during the construction process.*

*If you have any questions concerning this wetland report, please feel free to contact me at the above number.*

*Sincerely,*

*Richard Zulick*
